IT Project Manager (Health – Hospital)

Department of Medical and Telecommunication Technologies – Vall d'Hebron University Hospital

This position will be directly working with the Department of Information Systems and Decision Support in the Vall d'Hebron University Hospital (HUVH) and collaborating at the same time with the Statistics and Bioinformatics Unit from VHIR.

The HUVH is the largest hospital complex in Catalonia (Spain) and one of the most important in Spain, offering complex healthcare through its public, teaching and community hospital. The Department of Information Systems and Decision Support has an innovative orientation in the approach and strategies to data collection and processing, including patient-reported outcomes. It has been pioneer in the country in developing the Value-Based Health Care model, employing systematic and participative methodologies.

We are looking for an *IT Project Manager* to provide a unique platform for the extraction of clinical data from information systems (healthcare or hospital) for re-use in research.

Contract linked to the project "TARTAGLIA: Red Federada de Inteligencia Artificial para acelerar la Investigación Sanitaria". Funding by Ministerio de Asuntos Económicos y Transformación Digital in the Next Generation founds.

JOB DESCRIPTION

Education and qualifications:

Required:

- University Degree or higher degree in Biotechnology, Bioengineering, Telecommunication Engineering or similar field.
- Fluency in Spanish, Catalan and English (intermediate)
- Organized, committed and a desire to learn.
